

INCART 20/05 - 03/06/2016 INCA MALLORCA

# MAGIC WALLS - JAN DOMS | LEF DYNAMICS

Jan Doms (NL) designed at the invitation of the IncArt Festival for the monumental Casal de Cas Metge Cifre in the center of Inca two 'magic' walls made out of 100 sheets of float glass.

In cooperation with architect **Olga Doreva** (BG) this new glass archi-sculpture will be built in six days in the great hall of this monumental patrician residence. The public can carefully walk between the walls and then sees the reflections in the most unexpected ways. It gives the experience like in a hall of mirrors. Hence the name of this archi-sculpture is titled: **Magic Walls**.
